ESTABLISHED 1833. TUESDAY EVENING, AUGUST 24, 1886. PRICE THREE CENTS

LOOSE!

Mr. Cutting is Given His Liberty.

He Talks About Himself and May be Banished from Mexico as an Agitator.

The People of Texas are Angered at the Sight of Other Troops.

CUTTING RELEASED.

He is Discharged Because Medina Waived Certain of His Rights.

WASHINGTON, Aug. 24.—An official telegram has been received from Minister Jackson confirming the press report of Cutting's release, but giving no particulars.

DENVER, Col., Aug. 24.—An El Paso special says: At 11:30 a.m. yesterday Cutting was taken once more before Judge Castenadas' court, when the official minutes of the Chihuahua supreme court, which had arrived yesterday were read to him, which recited the decree releasing him from further custody. The decision of the court is based entirely upon the fact that Medina, the offended party, had waived his right to a civil suit for damages, the court holding that this ended the proceedings of the state.

When released by the court, Cutting replied:

"As long as I am not further detained as a prisoner, I accept my liberty, and I request that a copy of the supreme court be given me for my future use."

This the court consented to do in Spanish.

Judge Castenadas sent a copy of the decree to Mr. Provincio, the jose politico, who sent back word that he in person would give Cutting his liberty, accompanied with some wholesome advice. Cutting said to a reporter:

"Well, I can't understand what all this has to do with my card in the El Paso *Herald*, for which, solely, I was arrested, for four weeks incarcerated, and was being tried at the time my government made a demand for my immediate release."

It is said on the other side of the river that the clause of the Mexican constitution prohibiting the residence of agitators and other dangerous characters within the republic will be enforced against Cutting.

A Laredo telegram says: "In connection with the fact that the military authorities in Mexico have, within the last week, purchased all the arms and amunition to be had in Laredo, it is also a fact that in addition to the 2,000 troops within a few hours march of Nuevo Laredo, there is at present 2,000 Mexican cavelry posted along the Rio Grande between Nuevo Laredo, and Piedras Negras. At the old town of Polafax, forty miles above here, there is a detachment of Mexican troops; and they are reported to be throwing up fortifications pending the final decision in the Cutting case. Great uneasiness prevails on the border concerning the utterly defenseless condition of the people, and sharp criticism on all sides is heard of the president's fishing trip to the Adirondacks while Mexico is pushing her troops to the Rio Grande in order to strike hard in the event of war being declared. The destruction of private property along the Rio Grande, on the American side, before an army could be mobilized, would, it is alleged, be great, and the value of the property destroyed would amount to more than the cost of a few thousand troops by the government at the principal points along the American border. The Mexicans say the Americans are a nation of shopkeepers and won't fight."

ANARCHISTS IN SESSION.

They Meet to Take Action on the Conviction of Their Chicago Brethren.

CLEVELAND, O., Aug. 24.—A meeting of the Cleveland group of anarchists was held last night to take action on the conviction of the Chicago anarchists. About 100 anarchists were present and several speeches were delivered. Christ Saam, the leader of the group, said the reigning class and not the anarchists had declared war, and war they should have to the knife. The struggle would continue, he said, until the great anarchist revolution swept away all law and dictation. Then all men would be equal. Saam was formerly of the opinion that the condemned men would not suffer death on the gallows, but if that should prove their fate it would not retard the anarchist movement. John Ohlson, another speaker, said that what had occurred in Chicago was liable to take place in Cleveland and other cities at any time. A committee was appointed to demand of Mayor Gardner the right to use the public square for a mass meeting of the working people to protest against the conviction of the Chicago conspirators.

Land League Heroes.

NEW YORK, Aug. 24.—Messrs. O'Brien, Deasy and Redmond, comprising a delegation from Ireland to the Chicago convention of the Irish National league, left for Europe on the steamer Wisconsin this noon.

John Fitzgerald, president of the Irish National league, on reaching his home at Lincoln, Nebraska, was saluted by all of the steam whistles and bells in the city and cheered by five thousand citizens. At the opera house he was congratulated by Governor Dawes and others.

SHOT HIS WIFE

In a Fit of Jealousy and Committed Suicide.

STERLING, Ill., Aug. 24.—Frank Wood, the son of respectable parents residing here, shot and instantly killed his wife in the house of Dr. Walter McPherson yesterday, and then committed suicide. He was jealous in nature and his wife had left him some weeks ago on account of his cruel and abusive treatment.

Smashup on the Michigan Central.

BATTLE CREEK, Mich., Aug, 24.—This morning six miles west of here, a freight train collided with the rear end of a west bound passenger train on the Michigan Central railroad. Two porters were badly injured, two Wagner coaches telescoped and three freight cars loaded with lumber and salt went down a forty foot embankment. A defective air brake caused the accident.

Ohio Republicans.

CINCINNATI, Aug. 24.—An incident of the Ohio republican state convention to be held to-morrow at Columbus, is to be the celebration of the thirtieth anniversaro of the establishment of the party. General James S. Robinson will be renominated for secretary of state. Joseph Cox, of Cincinnati, is the leading candidate for supreme judge.

Big Fortunes.

NEW YORK, Aug. 24.—General Mandlen, of Newport, who leaped from the steamer Umbria with his grandchild in his arms, left $300,000 to his only son, $250,000 to a grandson, and a like sum to two granddaughters. The late R. W. Ulrici, the St. Louis distiller, bequeathed $500,000 to his relatives and those of his deceased wife.

Another Tie-Up.

NEW YORK, Aug. 24.—The Belt line cars are tied up to-day, for the same reason that the Broad line is.

The Broadway railroad in New York was tied up yesterday on account of dissatisfaction with the new time table, which called for an additional trip within the regular hours.

MR. BLAINE

Opens the Maine Campaign Today.

LAKE SEBAGO, Me., Aug. 24.—James G. Blaine arrived here from Bar Harbor this morning. The regular campaign opened yesterday, and this is Mr. Blaine's opening speech. He is expected to thoroughly stump the state and will speak twice more this week. There was a large crowd to greet the distinguished statesman and he spoke for an hour and a half.

Alexander in a Yacht.

BUCHAREST, Aug. 24.—The yacht supposed to have Prince Alexander on board, a prisoner, passed Giurgevo, without stopping. It was expected to touch there. The yacht was signaled this morning near Selistria. It is supposed the revolutionists intend to land Prince Alexander on Russian territory.

Monroeville Items.

Candidates have made themselves scarce here this week.

Clover hulling has commenced, which proves that the grass crop will be good.

Charles Whittern's brick residence is nearing completion. It will be an improvement to the west end.

A large delegation from this place are making preparations to attend the county fair at Fort Wayne September 16. Fine stock, grain and fruits will be exhibited there from Monroeville.

The county commissioners were here Thursday inspecting bridges.

J. T. Pool received over $800 back pension the other day and now prides himself on having been with the boys in blue.

S. B. Purman will occupy the residence made vacant by Prof. Walker, on Mulberry street.

The Monroeville *Breeze*, under its present economical manager, is being recognized and favored by the people throughout the county. It now has a circulation much larger than that of any paper published here before. Its political principle is independent, but favors the true policy, democracy.

The public in general thinks that THE SENTINEL acts wisely toward the different candidates seeking public offices. It is the method of the would-be democratic paper (the *Journal*) to throw dirt on the candidates who are non-stockholders of that paper without any rightful cause whatever. Such steps are not appreciated in this section.

Two car loads of excursionists from this place picnicked at Warsaw last Tuesday.

Charles Whittern has the finest thirty-acre field of corn in the county, and don't you forget it. It can't be beat.

There will be a Sunday school picnic at Newport, better known as the Marquardt siding, two miles west of this place, next Saturday. Preparations are being made to have good speakers present, and a good time is anticipated. The Monroeville Sunday school, headed by the ladies' band, will attend.

Mr. Sam Wass, an old pioneer settler of Monroe township, died on the 14th inst., at his home south of town, at the age of sixty eight years. At his request before his death he was buried on the high bank south of his residence, where he did his last day's work last June. A large concourse of friends followed his remains Monday, Aug. 16, to the grave. Rev. S. D. Miller officiated.

Isaac Engle, son of Dr. Engle, and a prohibitionist candidate for treasurer, died as his father's residence last Tuesday, and was buried Thursday. The funeral services were conducted by Rev. A. J. Douglas at the Lutheran church. his body rests in the Massillon cemetery.

Mr. Wm. Clem, of lottery fame, has purchased Adam Scar's farm, southeast of town, and also his brick residence in this place. Mr. Clem intends to move to town in a short time.

Prof. W. S. Walker with his family, moved to Andrews, Ind., at which place he has accepted the professorship of the public schools at that place. Professor Walker has had charge of the Monroeville schools for the last two years, during which time he has made many warm friends, and left here to accept a more lucrative position, having there eight teachers under his charge. The professor is a man of fine educational ability, being a member of the State Teacher's association and was the manager of the Allen County Reading Circle. He carries with him the best of recommendations. P. OF L.

Mrs. Woodworth, the renowned evangelist, will open a series of meetings in a few days in the fair grounds adjoining Muncie.

BRANYAN

Is Nominated for Congress.

The Eleventh District Democratic Convention is Exciting and Productive of Dark Horses.

Huntington County Finally Captures the Prize on the Thirty-fifth Ballot.

BLUFFTON.

The Eleventh District Democratic Convention.

BLUFFTON, Ind., Aug. 24.—There is much interest here and, indeed, in the entire eleventh district, over the result of the democratic convention, which meets here to-day, to nominate a candidate for congress to succeed Major Steele. The eleventh district was a very close one before Howard county, with its large republican majority was lopped off. As now made up, it is in the neighborhood of 1,000 democratic majority, basing the figures on the estimate of 1884. That year there were 22,570 republican votes, 22,532 democratic, 481 prohibition and 1,318 for the national ticket. The republican plurality was only thirty-eight. Now the district is relieved of Howard county, with its republican majority of 1,045, leaving a democratic plurality, as per the figures of '84, of 1,007. This plurality makes democratic success tolerably certain, and hence there is a spirited contest for the nomination, and the convention is an important one. Every one of the eight counties comprising the district, except Jay and Blackford, have a man in the race. Hon. James F. McDowell, of Marion, has been on the track for the last three months. In Miami there is Dr. H. V. Passage, a member of the last legislature. Wabash will again offer Major Kidd. J. C. Branyan, of Huntington, is in the field and actively at work; Judge Bobo, of Adams, has announced himself.

So far as can be learned, all of these candidates will start in the race with the solid support of their respective counties. It is pretty well settled that the vote of Jay county will go to Bobo. Jay and Adams comprise a judicial district, and if Bobo can be gotten out of the way it will leave a desirable office to be filled by a democrat. Adams can well afford to give the judgeship to Jay for her support, and in all probability such an arrangement has been made. Jay, Blackford and Adams comprise a senatorial district and certainly Bobo should be shrewd enough to enlist the support of Blackford county. These three counties holding together will be very influential.

THE CONVENTION MEETS.

Special to THE SENTINEL.

BLUFFTON, Ind., Aug. 24.—The Eleventh congressional convention was held in this city to-day. The meeting was called to order by Chairman Hawkins. H. B. Smith was elected permanent chairman and E. Y. Sturgis, secretary.

The following names were announced as candidates for the nomination: James R. Bobo, of Decatur; James F. McDowell, of Marion; J. C. Branyan, of Huntington; H. V. Passage, of Peru, and M. H. Kidd, of Wabash.

On the first ballot Bobo received 59; Branyan, 37; Kidd, 34; McDowell, 37; Passage, 36.

The balloting continued without much change until the sixteenth ballot, when the McDowell and Passage names were withdrawn, and Harry Smith, of Hartford City, was announced as a dark horse. The next ballot showed the following result: Bobo, 64; Branyan, 45; Kidd, 71; Smith, 22.

On the 21st ballot Hugh Dougherty received the solid vote of Blackford county, but Mr. Dougherty ked the convention to please withdraw his name as under no consideration would he consent to be a candidate. On the 23d ballot Mr. Smith withdrew his name and the vote showed the following changes: Bobo, 82½; Kidd, 84½; Branyan, 37. Before the 27th ballot was taken Huntington county asked for fifteen minutes recess, which was granted.

4:44 p. m.—J. C. Branyan, of Huntington, was nominated on the thirty-fifth ballot.

May Result Fatally.

PERU, Aug. 24.—A probably fatal shooting occurred last night, about 11 o'clock, on East Canal street, at a house of ill fame kept by Mrs. Wooster. A gang of toughs began stoning the house, when John Wooster, the man of the house, appeared and opened fire into the crowd, one ball striking John Munning in the back. Munning is a hard character. He is very badly injured and has but slight chances of recovery.

INDIANA.

Complications in the Affairs of a Terre Haute Paper Manufacturing Company.

TERRE HAUTE, Aug. 24.—The announcement of the failure, yesterday, of M. T. Close, the paper mill man, caused considerable excitement, which was heightened by the information that he had also left town, and that the affairs of his business were in exceedingly bad shape. Close came hear two years ago from Iowa City, Ia., and brought with him $24,000 in machinery and $22,000 in cash. Terre Hante parties went in and formed a stock company with $75,000 capital, and a mill was erected for the manufacture of straw paper. About a year ago gentlemen owning $25.000 stock sold it to Close, taking a mortgage on the plant. Since then Close has mismanaged the business, and some of the gentlemen pressed him for payment. The employes were much in arrears for wages. A week ago he promised to pay them, but instead he took a night train, and left the city. This morning the men filed a mechanics' lien for $4,700. The holders of the mortgage then had a receiver appointed, who says he will continue the mill in operation. There is no telling how the affairs of the firm stand, as the books have disappeared. Close was supposed to be a rich man. It was known that he was interested with his brother at Iowa City in profitable enterprises. About a week ago word was received here that he had dissolved partnership with his brother. Close was heard from yesterday at Iowa City.

Aiding Flood Sufferers.

GALVESTON, Aug. 24.—The city council last night appropriated $15,000 for the benefit of storm sufferers of this city. The citizens have subscribed $5,000.

THE Harper Brothers, it seems, came "down to the sidewalk with uncovered heads" to secure the publication of General Grant's book. According to Colonel Frank Burr, of the Philadelphia *Times*, they approached the General with an offer of $50,000 for the work, he to tranfer the copyright. Grant was advised to accept this proposition, but declined on the ground that he was not willing to accept more than a fair compensation for the work, and what that would be could not be determined except by a royalty upon the actual sales of the volume. Whether this decision was the result of ingenuous modesty or a bit of financial foresight, it is impossible to say; but, considering the hundreds of thousands already realized, the wisdom of it is very apparent. The Harpers "came down," but not with sufficient cash.

REV. JOSEPH COOK has a sliding trap-door in the ceiling of one of the rooms of his house. It leads to his study, and he uses it when he wants to be alone. This comfortable arrangement excites some unappreciative person to say: "A similar arrangement in public halls, which would enable the audience to escape to the roof when Rev. Joseph is billed to lecture, would be very popular."

HAVOC!

On the Principal City of Burmah.

The Irrawaddy River Breaks the Levee and Makes 50,000 People of India Homeless.

The Story of Prince Alexander's Forced Abdication is Told Truly.

50,000 HOMELESS.

A Levee Breaks and a Town is Swept Away by Floods.

MANDALAY, Burmah, Aug. 24.—One of the enbankments of the Irrawady river burst in this city yesterday. So rapid was the flow of water, that in a few moments the whole district was flooded from four to twenty feet deep. Engineers at once cut a dam south of the city to allow the waters to subside. Fifty thousand persons are to-day homeless. Many food supply stores are swept away, and the result will be an approach to famine among the homeless population.

PRINCE ALEXANDER.

He is Aroused From His Slumbers to Hear of His Deposition.

LONDON, Aug. 24.—Authentic dispatches from Sofia show that the deposition if Prince Alexander, of Bulgaria, was accomplished during the night. According to the advices one thoroughly Russianized regiment of cavalry was detained in the city after nightfall, when the other troops retired to the barracks. This regiment, perfectly under the control of the revolutionists, surrounded the palace about two hours past midnight. Prince Alexander was in bed and the palace was closed. The revolutionary leaders, with the assistance of the soldiers, forced their way into the building, went to the prince's ante chamber and had him aroused. They bluntly made known to him the purpose of their intrusion. He was stunned, having been taken completely unawares. When he recovered his self-possession and realized the utter helplessness of his situation, he bitterly reproached his captors for their treachery. What followed is still rather obscure. The revolutionists declare Alexander signed a formal abdication and that in consequence of his refusal he was made a prisoner and confined in a remote prison, being told he would be kept there until he complied with the demands of the revolutionists. It is said the prince was removed from Sofia under a strong cavalry escort long before daybreak. The people did not become acquainted with even the fact of the *coup d'etat* until several hours after the prince had been removed from the palace.

PARIS, Aug. 24.—Reports are current here that Servia has begun to place her army on a war footing.

ST. PETERSBURG, Aug. 24.—The *Journal de St. Petersburg*, commenting on the Bulgarian crisis, says it hopes the politicians of Bulgaria and Roumelia, will have the wisdom to anderstand that the destinies of both nations depend upon the behavior of the people. "The power, with whom rests the decision of these destinies," adds the *Journal*, "desire above all things, peace, and the good will of the powers should be secured. Politicians should abstain from agitation and should not attempt to hamper their good intentions."

CONSTANTINOPLE, Aug. 24.—The porte has sent a circular to the powers concerning the Bulgarian crisis. It asks to be informed of their intention and opinion respecting the situation as soon as possible.

The net receipts from the Acton camp meeting this year amounted to $1,500.

THE young man who sleeps with a revolver under his pillow, as a defense against burglars, is never known to hurt one of these midnight prowlers, but he does shoot one of his own family quite frequently. If the family escape he is liable to plug the hired man, or perforate the servant girl. In Cincinnati, recently, a domestic was fatally shot by a young man who mistook her for a burglar. There is much less danger from burglars, frequently, than from those who arm themselves against them.

WHEN 'Squire Carver, of Waterville, Me., hurriedly drove on the covered bridge that spans the Sebasticook, for shelter from a sudden shower, he found two young men and two young women taking shelter there also. As soon as they saw the 'Squire they conferred eagerly, and then one of the men asked him if he wouldn't marry the other young man and one of the young women then and there. They had the necessary papers, in proper form, and so, while the rain pattered over their heads and the Sebasticook gurgled beneath their feet, William McClintock and Almira Jones were made one.

A HALF-DOZEN queer people were sent to the County Insane Asylum at a single sitting of the Brooklyn (N. Y.) City Court. One woman habitually piled her furniture in a heap, and as regularly thrashed her landlord when he called for her rent. Another believed that the doctors who were attending her had been dead and had returned from the grave. A third believed that she was gradually reduced to infantile weakness by a course of sophisticated food, while a fourth always saw strange animals crawling over her bed-clothes when she lay down at night. One male patient was in constant dread of rats, and in search of the "Pied Piper" for assistance, while another believed herself to be dead, and declined to speak further than to insist that it was all wrong to expect a dead person to answer questions or carry on a conversation.

I PASSED several hours on Mount MacGregor the other day, writes an Eastern correspondent. The Drexel cottage remains almost literally as when General Grant died. There are the bed upon which the illustrious commander breathed his last, his favorite chair, his garments, including dressing-gown, slippers, and hats, and a his medicines, cups, and the sponges with which he was wont to moisten his lips. You are shown pens with which he wrote the latter portion of his book, and quantities of paper cut in small sizes, by means of which he was wont to carry on his share of conversation. A number of the beautiful flower-pieces, wrought in immortelles, sent by the friends of the General, including the huge pillow from the Philadelphia Post, are also on view. All these relics are looked upon by the visitors in solemn silence. Some of them might with propriety be removed—notably the medicines and vessels. Outside the cottage all looks calm and beautiful.

The Learned and Eminent Scholar, Andrew D. White, Ex-President of Cornell University, Ithaca, N. Y., writes under date Dec. 2, 1884: "Long experience has taught my family to prize Pond's Extract very highly and to regard it as one of the absolute necessities of housekeeping." Such testimony should induce all families to at least try Pond's Extract; an invaluable remedy for all Pains and Hemorrhages.

NEW YORK, Aug. 23.—Scalpers are selling tickets to Chicago on a basis of $12.

Why do you suffer with backache, pain in the chest, rheumatism, or lameness anywhere when a Hop Plaster will surely give you relief. Druggists sell them, 25 cents.

Hay Fever.

I have been a hay fever sufferer for three years; have often heard Ely's Cream Balm spoken of in the highest terms; did not take much stock in it because of the many quack medicines. A friend persuaded me to try the Balm, and I did so with wonderful success—T. S. Greer, Syracuse, N. Y.

I can recommend Ely's Cream Balm to all hay fever sufferers, it is, in my opinion, a sure cure. I was afflicted for 25 years, and never before found permanent relief.—W. H. Haskins, Marshfield, Vt.

AN incident in the under stratum of social life was brought to official notice, in Chicago, in a way to suggest a new phase of industry, if properly developed. A man over whom the effects of numerous potations were gradually creeping, but who still retained sufficient mental acuteness to realize the need of a protector, hired a small boy, at the reasonable compensation of a nickel, to guard him while he slept off "the influence" in a box-car. The urchin had no sooner begun his vigil than he was approached by two speculative men, who hired him for a dime to go and see what time it was. Little Gavroche pretended to accept the offer, but secreted himself near by and watched the fellows rob his unconscious patron. Then he had them arrested. A system of watch-boys would be a profitable business enterprise, if such shrewd chaps as this one could be secured, for the benefit of men who desire to see life and are not able to resist the effects of the adventure.

THE Baldwin Locomotive Works, Philadelphia, have just completed and shipped engine numbered 8,000. The first locomotive built by these works was turned out in December, 1832, and it took twenty years, until November, 1852, to build 500 engines. The second 500 engines was built in eight years, number 1,000 being finished February, 1860. The next six years saw the third 500 built, number 1,500 leaving the shop July, 1866. The fourth 500 were built in three years, by Oct. 30, 1869; the fifth 500 in two years, and the sixth and seventh 500 each in one year, engine 3,500 leaving Nov. 20, 1873. Business then slackened, three years being required to build the next 500, and two years the following 500, engine number 4,500 leaving Dec. 17, 1878. Then trade improved, 500 engines being built in fifteen months, and 1,000 more engines in twenty-two months, while 500 more engines were finished in ten months, number 6,500 leaving Dec. 6, 1882, and marking a half century for the works. The next eight months saw 500 more built, and before the close of 1884 number 7,500 was turned out. Work has again slackened, and nineteen months were required for the final 500 locomotives, number 8,000 having just left the establishment.

In the Dear Old Days.

We differ in creed and politics, but we are a unit all the same on the desirableness of a fine head of hair. If you mourn the loss oft his blessing and ornament, a bottle or two of Parker's Hair Balsam will make you look as you did in the dear old days. It is worth trying. It is the only standard 50c article for the hair.

The first application for a copy of the Democratic Campaign book for 1886 was made by a Dakota democrat, who wanted some fresh ammunition to fire at the republicans in that vicinity. The book will be issued in a short time.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,

When she had Children, she gave them Castoria.

TUESDAY, AUG. 24, 1886.

REGARDING M. Pasteur's treatment for hydrophobia Dr. Charles R. Drysdale, senior physician to the London Metropolitan Free Hospital, writes as follows to the London *Times* from Paris:

Having felt some uncertainty as to the efficacy of M. Pasteur's process for combating that fatal disease hydrophobia, I came here some days ago to study the question and the evidence on the spot. I hasten to say that all my doubts as to the validity of this greatest of modern discoveries have been dispelled, and for the following reasons: M. Grancher, who has made a careful analysis of the cases treated up to the 16th of June at the Rue Vauquelin, informed me that of ninety-six patients bitten by dogs (the disease of which was certified either by the inoculation of other animals after their death with the brain or spinal cord proving fatal, or by the fact that some animal bitten by the dog had succumbed to hydrophobia), of these ninety-six cases only one died subsequently to the curative inoculations. This gives a death rate of only 1.04 per cent. Again, 644 patients had been bitten by dogs, the madness of which was certified to by the veterinary practitioner of the commune, and out of these there were three deaths, which gives a death-rate of 0.46 per cent. Taking these two categories together, the death-rate was only 0.75 per cent., whereas from a very accurate series of statistics collected by M. Leblanc, veterinary practitioner of the city of Paris, it results that, as a rule, 16 per cent. of such cases may be expected to succumb to hydrophobia. The value, then, as M. Grancher says, of the curative process of M. Pasteur may be represented as twenty-three times as great as that of all other treatments. I may add that, with the exception of the prick with the fine-pointed injection syringe, patients have no other annoyance to complain of, as there are absolutely no symptoms, and ten punctures on ten successive days are sufficient. To me the question is, therefore, judged, and all who are in danger should submit to this little operation.

MISS DOLORES LLEONARTY CASSANOVAS has just received the degree of M. D., at Barcelona. She began, says the *Pall Mall Gazette*, her university studies at the age of 8, when at 13 she became a B. A., and now, at the ripe age 19, after coming out first in all her examinations, and taking numerous prizes, she is a fully qualified physician and surgeon. Fancy a female B. A. of 13 discoursing on hideous diseases with six-syllabled names, and correctly diagnosing and prescribing for her brothers and sisters! But it is what we have got to expect, and the fair Spaniard is to be congratulated on being the first of her sex to show what can be done in the way of rapid development. Miss Dolores, etc., may be fairly addressed, like her namesake sung of by Swinburne, as 'wise among women and wisest, our Lady of Pain.'

LAW CLERK AUSTETT, of the Supervising Architect's Office of the Treasury Department at Washington, is authority for the following story: Gov. Thompson, the new Assistant Secretary, who succeeded the Hon. William E. Smith in that position, has been tormented by a large number of office-seekers since he assumed charge of the appointing power. He has already learned how to distinguish the professional place-hunter. A great proportion of those who come to him are, of course, those who have applied to his predecessor and are still waiting. Their unquenchable desire to serve their country and themselves in the Treasury Department leads them to attempt a little imposition upon Gov. Thompson. Every day some one of them prefaces his or her application with the statement: "Your predecessor, Mr. Smith, promised that I should have a position on such and such a day," naming almost the hour when they were to receive their appointment. This little trick of theirs was related to Mr. Smith when he visited the Department last week; and calling upon Gov. Thompson a few minutes later he remarked good-naturedly: "If you believe all the stories office-seekers tell you about me you must believe me to be the greatest economizer of truth on earth," "Oh, no," replied the Governor quickly, "I don't believe that, but I am beginning to think you the most promising man in America."

"THE Emperor of Russia," according to the London *Truth*, "is desirous of forming a new sort of Holy Alliance for the purpose of 'boycotting' France, as a punishment for the expulsion of the Orleans Princes. It is proposed that the members of this solemn league and covenant shall bind themselves not to visit Paris, Cannes, Nice, or any place in France, and the *mot d'ordre* is to be sent about that courteirs and others who disport themselves in that country will get into disgrace. The abrupt departure from Paris last month of several members of the imperial family was caused by the Emperor's order that they should quit France. The Emperor of Austria, the King of Denmark, the King of Sweden, and the King of Italy are all more or less favorable to the Czar's proposal."

ZOLA, the famous French novelist, is now engaged upon a new novel to be called "La Terre," which will be devoted to the examination of the life of the peasantry, with special reference to their earth-hunger. He hopes to have it ready by the beginning of next year. Afterward, it is said, he will take up railways, the army, and journalism as the subjects of three more novels.

The city council meets in regular session to-night.

Mr. Wm. Meyer, of Fitch, Meyer & Co., the hatters, went to Chicago at noon.

Gath the well known correspondent who bitterly opposed the election of Cleveland, now says that the president is proving one of the best the country ever had, and that he will be renominated and elected. Gath's change of heart is commendable.

The Ohio Veteran association elected the following officers at their reunion: President, General W. S. Rosecrans; vice-president, J. E. Graham; adjutant, H. O. Crosby; quartermaster, Mart Swartz; Comrades H. F. Underwood, Peru; Captain Gablin, Jackson, Michigan, and Commander Centerville, Post Ohio, executive committee.

Already the society people, who are fond of amusements, are beginning to inquire, "What will take the place of the roller skating rink this winter?" Progressive eucher appears to have had its run, while checkers and chess are decidedly old fashioned. The use of quilts, which formerly necessitated "quilting bees," has been done away with by the new and cheap spreads, so that it now looks as though people would settle down to the original game of whist.

Master Benoit Ellert is confined to his bed with typhoid fever.

Weather indications for Indiana today are fair weather, slightly warmer.

Joseph A. M. Storm sues Harry Hammill for $105. T. E. Ellison is his counsel.

J. W. Jackson, chief surgeon of the Wabash, has made the following appointments: Dr. Langler Whitney, former house surgeon, is appointed surgeon-in-charge of the Wabash, St. Louis and Pacific hospital at Springfield, Ill; Dr. F. L. Matthews, surgeon-in-charge, is appointed occulist and aurist for the eastern division.

The construction train took a load of steel rails to the starting point of the M., G. R. and I., yesterday, and the work of laying the iron will begin immediately. The track laying machine, which is to be used in the work, has not yet arrived, but is expected in a week or ten days. With this machine and a gang of forty or forty-five men the iron can be laid at the rate of a mile and a quarter a day and it is possible to lay one mile and a half in a day. This is a great time-saving machine, as by the ordinary way of laying iron a half mile is a large day's work.

GAS AND OIL.

The Chances of Finding Them in Fort Wayne.

The preparations to sink a well for oil or gas in this city is exciting a good deal of mental speculation and the contractor will sink a shaft next week. Professor John Collett, who has been inspecting the gas and oil regions in Ohio says that the northern part of Indiana, particularly north of the Wabash and Iroquois rivers, presents the same geological features that are presented in the gas and oil regions of Ohio, and there is, consequently, a possibility of finding gas and oil, but no great probability, and he thinks that the prospects are not suffcient to justify an individual in putting down a well. His idea is that each county in the extreme northern portion of the state should vote a sufficient appropriation to put down three wells, one in the center, one in the northwestern and one in the southwestern portion, and that the cost of this would be about fifty cents a foot for the first 500 feet, eighty cents a foot for the next 500 and $1 a foot for the next 500 feet. The contract should be made at such a scale of prices for a six inch well, with the privilege of stopping where gas or oil was met; but, if necessary, eventually going to the depth of 2,000 feet.

EX-TREASURER SPINNER writes a letter to a Washington paper, in which he tells how the first employment of female clerks in the Government service came about. General Spinner himself was the first to suggest the innovation, and urged upon the Secretary of the Treasury and other officials that young women could not only do much of the clerical work better and faster than men, but that they could be secured for half the wages. Mr. Spinner dwells particularly upon this point in his letter, and seems to plume himself quite as much upon his economical notions as upon his part in opening the departments to women. The ex-Treasurer is entitled to limited thanks from the women employes of the Government. Had he omitted to discriminate against them in the matter of wages, they would rise up and call him blessed.

An Old Stand, But a New Firm.

Messrs. Rowe & Spencer, late of Peru, announce to the public that they have purchased the meat market formerly owned by Leopold Wolf, at 189 Broadway. This firm are not strangers to the city, having been former residents here, where they are well and favorably known. Both are practical in their business and know how to attend to the wants of customers. Their market is as neat as any in the city. They invite all to pay them a visit, knowing they can please and furnish first-class meats of all kinds.

We understand that Messrs. Dawson & Karn, the music dealers, leave this evening for New York City. Their success since they opened their new store room at No. 75 Calhoun street, has been very flattering. It is their intention to deal in nothing but the highest grade of pianos, and organs and go to make their selections direct from the factories.

He Appreciates a Mother-in-Law

A Dakota editor made the following statement in his paper a few weeks since:

"Times being rather hard, we are going to take our wife to the home of her mother-in-law next week for a short visit and we will give our readers a short vacation by not issuing any paper. They won't lose much, for there is little news going just now, and we print this week an editorial on the tariff which would have appeared next week. The only thing that we had to leave out on this account is Bill Jones' ad. about a farm for sale, but that will be of no consequence as he hasn't paid us anything for it yet. Brethren, white paper is too blamed dear to fool it away when our mother-in-law will keep us a week for nothing.

"What we learn with pleasure we never forget."—Alfred Mercier. The following is a case in point. "I paid out hundreds of dollars without receiving any benefit," says Mrs. Emily Rhoads, of McBrides, Mich. "I had female complaints, especially 'dragging-down,' for over six years. Dr. R. V. Pierce's 'Favorite Prescription' did me more good than any medicine I ever took. I advise every sick lady to take it." And so do we. It never disappoints its patrons. Drug gists sell it.

ON THE INCREASE.

The Ravage of Bright's Disease

(From the Louisville (Ky.) Courier-Journal.)

The greed of distillers has urged them to push their distillations so as to get as much whiskey from the grain as possible. From the old-time standard of one gallon and a half they have increased the product to three, then to four, and some distillers boast of getting even five gallons of whiskey from a bushel of grain. This increased product is obtained by raising the temperature until both the volatile and the essential oils from destructive distillation are thrown off, and consequently an increased percentage of fusel oils (deadly poison) is found mixed with the whiskey and cannot easily be gotten rid of. This fusel oil will seriously damage the stomach of those who drink it; or if the stomach escape, this poison affects the kidneys, producing glandular degeneration, a form of Bright's disease, which is to-day alarmingly prevalent and on the increase. Fusel oil is closely allied to creosote in its characteristics and its effects on the human system. It is a corrosive poison, that, in its concentrated form, will immediately kill if swallowed, or if allowed to linger in the tissues does destructive work upon the delicate vital organs." The discoverers and only manufacturers in the world of an absolutely pure whiskey, entirely free from fusel oil, pledge their article to be not only a distillation from malt—the malt supplying the food quality—but by a costly process of redistillation it is rendered so entirely devoid of any poisonous principle, that the most distinguished chemists certify "that no trace of fusel oil is to be found in it." By this process the fire that crazes the brain and vitiates the blood is also eliminated, but at the same time none of its delicate aroma is lost—none of its valerianates are destroyed—and its strength remains the same with its full flavor. It is not to be considered even a mild stimulant, as it remains a strong intoxicant. It is not a medicated whisky, but a pure whiskey for medicinal use, demanded by the medical profession; hence the Duffy's pure malt whisky is not only a standard of the pharmacopœia, but, as a beverage, it is the preferred and most popular among the best and oldest whiskies in the market.

Almost every family had a visitor during the encampment.

ESTABLISHED 1833. TUESDAY EVENING, AUGUST 24, 1886. PRICE THREE CENTS

LOOSE!

Mr. Cutting is Given His Liberty.

He Talks About Himself and May be Banished from Mexico as an Agitator.

The People of Texas are Angered at the Sight of Other Troops.

CUTTING RELEASED.

He is Discharged Because Medina Waived Certain of His Rights.

WASHINGTON, Aug. 24.—An official telegram has been received from Minister Jackson confirming the press report of Cutting's release, but giving no particulars.

DENVER, Col., Aug. 24.—An El Paso special says: At 11:30 a.m. yesterday Cutting was taken once more before Judge Castenadas' court, when the official minutes of the Chihuahua supreme court, which had arrived yesterday were read to him, which recited the decree releasing him from further custody. The decision of the court is based entirely upon the fact that Medina, the offended party, had waived his right to a civil suit for damages, the court holding that this ended the proceedings of the state.

When released by the court, Cutting replied:

"As long as I am not further detained as a prisoner, I accept my liberty, and I request that a copy of the supreme court be given me for my future use."

This the court consented to do in Spanish.

Judge Castenadas sent a copy of the decree to Mr. Provincio, the jose politico, who sent back word that he in person would give Cutting his liberty, accompanied with some wholesome advice. Cutting said to a reporter:

"Well, I can't understand what all this has to do with my card in the El Paso *Herald*, for which, solely, I was arrested, for four weeks incarcerated, and was being tried at the time my government made a damand for my immediate release."

It is said on the other side of the river that the clause of the Mexican constitution prohibiting the residence of agitators and other dangerous characters within the republic will be enforced against Cutting.

A Laredo telegram says: "In connection with the fact that the military authorities in Mexico have, within the last week, purchased all the arms and ammunition to be had in Laredo, it is also a fact that in addition to the 2,000 troops within a few hours march of Nuevo Laredo, there is at present 2,000 Mexican cavalry posted along the Rio Grande between Nuevo Laredo, and Piedras Negras. At the old town of Polafax, forty miles above here, there is a detachment of Mexican troops; and they are reported to be throwing up fortifications pending the final decision in the Cutting case. Great uneasiness prevails on the border concerning the utterly defenseless condition of the people, and sharp criticism on all sides is heard of the president's fishing trip to the Adirondacks while Mexico is pushing her troops to the Rio Grande in order to strike hard in the event of war being declared. The destruction of private property along the Rio Grande, on the American side, before an army could be mobilized, would, it is alleged, be great, and the value of the property destroyed would amount to more than the cost of a few thousand troops by the government at the principal points along the American border. The Mexicans say the Americans are a nation of shopkeepers and won't fight."

ANARCHISTS IN SESSION.

They Meet to Take Action on the Conviction of Their Chicago Brethren.

CLEVELAND, O., Aug. 24.—A meeting of the Cleveland group of anarchists was held last night to take action on the conviction of the Chicago anarchists. About 100 anarchists were present and several speeches were delivered. Christ Saam, the leader of the group, said the reigning class and not the anarchists had declared war, and war they should have to the knife. The struggle would continue, he said, until the great anarchist revolution swept away all law and dictation. Then all men would be equal. Saam was formerly of the opinion that the condemned men would not suffer death on the gallows, but if that should prove their fate it would not retard the anarchist movement. John Ohlson, another speaker, said that what had occurred in Chicago was liable to take place in Cleveland and other cities at any time. A committee was appointed to demand of Mayor Gardner the right to use the public square for a mass meeting of the working people to protest against the conviction of the Chicago conspirators.

Land League Heroes.

NEW YORK, Aug. 24.—Messrs. O'Brien, Deasy and Redmond, comprising a delegation from Ireland to the Chicago convention of the Irish National league, left for Europe on the steamer Wisconsin this noon.

John Fitzgerald, president of the Irish National league, on reaching his home at Lincoln, Nebraska, was saluted by all of the steam whistles and bells in the city and cheered by five thousand citizens. At the opera house he was congratulated by Governor Dawes and others.

SHOT HIS WIFE

In a Fit of Jealousy and Committed Suicide.

STERLING, Ill., Aug. 24.—Frank Wood, the son of respectable parents residing here, shot and instantly killed his wife in the house of Dr. Walter McPherson yesterday, and then committed suicide. He was jealous in nature and his wife had left him some weeks ago on account of his cruel and abusive treatment.

Smashup on the Michigan Central.

BATTLE CREEK, Mich., Aug. 24.—This morning six miles west of here, a freight train collided with the rear end of a west bound passenger train on the Michigan Central railroad. Two porters were badly injured, two Wagner coaches telescoped and three freight cars loaded with lumber and salt went down a forty foot embankment. A defective air brake caused the accident.

Ohio Republicans.

CINCINNATI, Aug. 24.—An incident of the Ohio republican state convention to be held to-morrow at Columbus, is to be the celebration of the thirtieth anniversaro of the establishment of the party. General James S. Robinson will be renominated for secretary of state. Joseph Cox, of Cincinnati, is the leading candidate for supreme judge.

Big Fortunes.

NEW YORK, Aug. 24.—General Mandlen, of Newport, who leaped from the steamer Umbria with his grandchild in his arms, left $300,000 to his only son, $250,000 to a grandson, and a like sum to two granddaughters. The late R. W. Ulrici, the St. Louis distiller, bequeathed $500,000 to his relatives and those of his deceased wife.

Another Tie-Up.

NEW YORK, Aug. 24.—The Belt line cars are tied up to-day, for the same reason that the Broad line is.

The Broadway railroad in New York was tied up yesterday on account of dissatisfaction with the new time table, which called for an additional trip within the regular hours.

MR. BLAINE

Opens the Maine Campaign To-day.

LAKE SEBAGO, Me., Aug. 24.—James G. Blaine arrived here from Bar Harbor this morning. The regular campaign opened yesterday, and this is Mr. Blaine's opening speech. He is expected to thoroughly stump the state and will speak twice more this week. There was a large crowd to greet the distinguished statesman and he spoke for an hour and a half.

Alexander in a Yacht.

BUCHAREST, Aug. 24.—The yacht supposed to have Prince Alexander on board, a prisoner, passed Giurgevo, without stopping. It was expected to touch there. The yacht was signaled this morning near Selistria. It is supposed the revolutionists intend to land Prince Alexander on Russian territory.

Monroeville Items.

Candidates have made themselves scarce here this week.

Clover hulling has commenced, which proves that the grass crop will be good.

Charles Whittern's brick residence is nearing completion. It will be an improvement to the west end.

A large delegation from this place are making preparations to attend the county fair at Fort Wayne September 16. Fine stock, grain and fruits will be exhibited there from Monroeville.

The county commissioners were here Thursday inspecting bridges.

J. T. Pool received over $800 back pension the other day and now prides himself on having been with the boys in blue.

S. B. Furman will occupy the residence made vacant by Prof. Walker, on Mulberry street.

The Monroeville *Breeze*, under its present economical manager, is being recognized and favored by the people throughout the county. It now has a circulation much larger than that of any paper published here before. Its political principle is independent, but favors the true policy, democracy.

The public in general thinks that THE SENTINEL acts wisely toward the different candidates seeking public offices. It is the method of the would-be democratic paper (the *Journal*) to throw dirt on the candidates who are non-stockholders of that paper without any rightful cause whatever. Such steps are not appreciated in this section.

Two car loads of excursionists from this place picnicked at Warsaw last Tuesday.

Charles Whittern has the finest thirty-acre field of corn in the county, and don't you forget it. It can't be beat.

There will be a Sunday school picnic at Newport, better known as the Marquardt siding, two miles west of this place, next Saturday. Preparations are being made to have good speakers present, and a good time is anticipated. The Monroeville Sunday school, headed by the ladies' band, will attend.

Mr. Sam Wass, an old pioneer settler of Monroe township, died on the 14th inst., at his home south of town, at the age of sixty eight years. At his request before his death he was buried on the high bank south of his residence, where he did his last day's work last June. A large concourse of friends followed his remains Monday, Aug. 16, to the grave. Rev. S. D. Miller officiated.

Isaac Engle, son of Dr. Engle, and a prohibitionist candidate for treasurer, died as his father's residence last Tuesday, and was buried Thursday. The funeral services were conducted by Rev. A. J. Douglas at the Lutheran church. his body rests in the Massillon cemetery.

Mr. Wm. Clem, of lottery fame, has purchased Adam Sear's farm, southeast of town, and also his brick residence in this place. Mr. Clem intends to move to town in a short time.

Prof. W. S. Walker with his family, moved to Andrews, Ind., at which place he has accepted the professorship of the public schools at that place. Professor Walker has had charge of the Monroeville schools for the last two years, during which time he has made many warm friends, and left here to accept a more lucrative position, having there eight teachers under his charge. The professor is a man of fine educational ability, being a member of the State Teacher's association and was the manager of the Allen County Reading Circle. He carries with him the best of recommendations. P. OF L.

Huntington County Finally Captures the Prize on the Thirty-fifth Ballot.

BLUFFTON.

The Eleventh District Democratic Convention.

BLUFFTON, Ind., Aug. 24.—There is much interest here and, indeed, in the entire eleventh district, over the result of the democratic convention, which meets here to-day, to nominate a candidate for congress to succeed Major Steele. The eleventh district was a very close one before Howard county, with its large republican majority was lopped off. As now made up, it is in the neighborhood of 1,000 democratic majority, basing the figures on the estimate of 1884. That year there were 22,570 republican votes, 22,532 democratic, 481 prohibition and 1,318 for the national ticket. The republican plurality was only thirty-eight. Now the district is relieved of Howard county, with its republican majority of 1,045, leaving a democratic plurality, as per the figures of '84, of 1,007. This plurality makes democratic success tolerably certain, and hence there is a spirited contest for the nomination, and the convention is an important one. Every one of the eight counties comprising the district, except Jay and Blackford, have a man in the race. Hon. James F. McDowell, of Marion, has been on the track for the last three months. In Miami there is Dr. H. V. Passage, a member of the last legislature. Wabash will again offer Major Kidd. J. C. Branyan, of Huntington, is in the field and actively at work; Judge Bobo, of Adams, has announced himself.

So far as can be learned, all of these candidates will start in the race with the solid support of their respective counties. It is pretty well settled that the vote of Jay county will go to Bobo. Jay and Adams comprise a judicial district, and if Bobo can be gotten out of the way it will leave a desirable office to be filled by a democrat. Adams can well afford to give the judgeship to Jay for her support, and in all probability such an arrangement has been made. Jay, Blackford and Adams comprise a senatorial district and certainly Bobo should be shrewd enough to enlist the support of Blackford county. These three counties holding together will be very influential.

THE CONVENTION MEETS.

Special to THE SENTINEL.

BLUFFTON, Ind., Aug. 24.—The Eleventh congressional convention was held in this city to-day. The meeting was called to order by Chairman Hawkins. H. B. Smith was elected permanent chairman and E. Y. Sturgis, secretary.

The following names were announced as candidates for the nomination: James R. Bobo, of Decatur; James F. McDowell, of Marion; J. C. Branyan, of Huntington; H. V. Passage, of Peru, and M. H. Kidd, of Wabash.

On the first ballot Bobo received 50; Branyan, 37; Kidd, 34; McDowell, 37; Passage, 36.

The balloting continued without much change until the sixteenth ballot, when the McDowell and Passage names were withdrawn, and Harry Smith, of Hartford City, was announced as a dark horse. The next ballot showed the following result: Bobo, 64; Branyan, 45; Kidd, 71; Smith, 22.

On the 21st ballot Hugh Dougherty received the solid vote of Blackford county, but Mr. Dougherty ked the convention to please withdraw his name, as under no consideration would he consent to be a candidate. On the 23d ballot Mr. Smith withdrew his name and the vote showed the following changes: Bobo, 82½; Kidd, 84½; Branyan, 37. Before the 27th ballot was taken Huntington county asked for fifteen minutes recess, which was granted.

4:44 p. m.—J. C. Branyan, of Huntington, was nominated on the thirty-fifth ballot.

May Result Fatally.

PERU, Aug. 24.—A probably fatal shooting occurred last night, about 11 o'clock, on East Canal street, at a house of ill fame kept by Mrs. Wooster. A gang of toughs began stoning the house, when John Wooster, the man of the house, appeared and opened fire into the crowd, one ball striking John Munning in the back. Munning is a hard character. He is very badly injured and has but slight chances of recovery.

INDIANA.

Complications in the Affairs of a Terre Haute Paper Manufacturing Company.

TERRE HAUTE, Aug. 24.—The announcement of the failure, yesterday, of M. T. Close, the paper mill man, caused considerable excitement, which was heightened by the information that he had also left town, and that the affairs of his business were in exceedingly bad shape. Close came hear two years ago from Iowa City, Ia., and brought with him $24,000 in machinery and $22,000 in cash. Terre Haute parties went in and formed a stock company with $75,000 capital, and a mill was erected for the manufacture of straw paper. About a year ago gentlemen owning $25,000 stock sold it to Close, taking a mortgage on the plant. Since then Close has mismanaged the business, and some of the gentlemen pressed him for payment. The employes were much in arrears for wages. A week ago he promised to pay them, but instead he took a night train, and left the city. This morning the men filed a mechanics' lien for $4,700. The holders of the mortgage then had a receiver appointed, who says he will continue the mill in operation. There is no telling how the affairs of the firm stand, as the books have disappeared. Close was supposed to be a rich man. It was known that he was interested with his brother at Iowa City in profitable enterprises. About a week ago word was received here that he had dissolved partnership with his brother. Close was heard from yesterday at Iowa City.

THE Harper Brothers, it seems, came "down to the sidewalk with uncovered heads" to secure the publication of General Grant's book. According to Colonel Frank Burr, of the Philadelphia *Times*, they approached the General with an offer of $50,000 for the work, he to tranfer the copyright. Grant was advised to accept this proposition, but declined on the ground that he was not willing to accept more than a fair compensation for the work, and what that would be could not be determined except by a royalty upon the actual sales of the volume. Whether this decision was the result of ingenuous modesty or a bit of financial foresight, it is impossible to say; but, considering the hundreds of thousands already realized, the wisdom of it is very apparent. The Harpers "came down," but not with sufficient cash.

REV. JOSEPH COOK has a sliding trap-door in the ceiling of one of the rooms of his house. It leads to his study, and he uses it when he wants to be alone. This comfortable arrangement excites some unappreciative person to say: "A similar arrangement in public halls, which would enable the audience to escape to the roof when Rev. Joseph is billed to lecture, would be very popular."

On the Principal City of Burmah.

The Irrawaddy River Breaks the Levee and Makes 50,000 People of India Homeless.

The Story of Prince Alexander's Forced Abdication is Told Truly.

50,000 HOMELESS.

A Levee Breaks and a Town is Swept Away by Floods.

MANDALAY, Burmah, Aug. 24.—One of the embankments of the Irrawady river burst in this city yesterday. So rapid was the flow of water, that in a few moments the whole district was flooded from four to twenty feet deep. Engineers at once cut a dam south of the city to allow the waters to subside. Fifty thousand persons are to-day homeless. Many food supply stores are swept away, and the result will be an approach to famine among the homeless population.

PRINCE ALEXANDER.

He is Aroused From His Slumbers to Hear of His Deposition.

LONDON, Aug. 24.—Authentic dispatches from Sofia show that the deposition if Prince Alexander, of Bulgarie, was accomplished during the night. According to the advices one thoroughly Russianized regiment of cavalry was detained in the city after nightfall, when the other troops retired to the barracks. This regiment, perfectly under the control of the revolutionists, surrounded the palace about two hours past midnight. Prince Alexander was in bed and the palace was closed. The revolutionary leaders, with the assistance of the soldiers, forced their way into the building, went to the prince's ante chamber and had him aroused. They bluntly made known to him the purpose of their intrusion. He was stunned, having been taken completely unawares. When he recovered his self-possession and realized the utter helplessness of his situation, he bitterly reproached his captors for their treachery. What followed is still rather obscure. The revolutionists declare Alexander signed a formal abdication and that in consequence of his refusal he was made a prisoner and confined in a remote prison, being told he would be kept there until he complied with the demands of the revolutionists. It is said the prince was removed from Sofia under a strong cavalry escort long before daybreak. The people did not become acquainted with even the fact of the *coup d'etat* until several hours after the prince had been removed from the palace.

PARIS, Aug. 24.—Reports are current here that Servia has begun to place her army on a war footing.

ST. PETERSBURG, Aug. 24.—The *Journal de St. Petersburg*, commenting on the Bulgarian crisis, says it hopes the politicians of Bulgaria and Roumelia, will have the wisdom to understand that the destinies of both nations depend upon the behavior of the people. "The power, with whom rests the decision of these destinies," adds the *Journal*, "desire above all things, peace, and the good will of the powers should be secured. Politicians should abstain from agitation and should not attempt to hamper their good intentions."

CONSTANTINOPLE, Aug. 24.—The porte has sent a circular to the powers concerning the Bulgarian crisis. It asks to be informed of their intention and opinion respecting the situation as soon as possible.

The net receipts from the Acton camp meeting this year amounted to $1,500.

THE young man who sleeps with a revolver under his pillow, as a defense against burglars, is never known to hurt one of these midnight prowlers, but he does shoot one of his own family quite frequently. If the family escape he is liable to plug the hired man, or perforate the servant girl. In Cincinnati, recently, a domestic was fatally shot by a young man who mistook her for a burglar. There is much less danger from burglars, frequently, than from those who arm themselves against them.

WHEN Squire Carver, of Waterville, Me., hurriedly drove on the covered bridge that spans the Sebasticook, for shelter from a sudden shower, he found two young men and two young women taking shelter there also. As soon as they saw the Squire they conferred eagerly, and then one of the men asked him if he wouldn't marry the other young man and one of the young women then and there. They had the necessary papers, in proper form, and so, while the rain pattered over their heads and the Sebasticook gurgled beneath their feet, William McClintock and Almira Jones were made one.

A HALF-DOZEN queer people were sent to the County Insane Asylum at a single sitting of the Brooklyn (N. Y.) City Court. One woman habitually piled her furniture in a heap, and as regularly thrashed her landlord when he called for her rent. Another believed that the doctors who were attending her had been dead and had returned from the grave. A third believed that she was gradually reduced to infantile weakness by a course of sophisticated food, while a fourth always saw strange animals crawling over her bed-clothes when she lay down at night. One male patient was in constant dread of rats, and in search of the "Pied Piper" for assistance, while another believed herself to be dead, and declined to speak further than to insist that it was all wrong to expect a dead person to answer questions or carry on a conversation.

I PASSED several hours on Mount MacGregor the other day, writes an Eastern correspondent. The Drexel cottage remains almost literally as when General Grant died. There are the bed upon which the illustrious commander breathed his last, his favorite chair, his garments, including dressing-gown, slippers, and hats, and a his medicines, cups, and the sponges with which he was wont to moisten his lips. You are shown pens with which he wrote the latter portion of his book, and quantities of paper cut in small sizes, by means of which he was wont to carry on his share of conversation. A number of the beautiful flower-pieces, wrought in immortelles, sent by the friends of the General, including the huge pillow from the Philadelphia Post, are also on view. All these relics are looked upon by the visitors in solemn silence. Some of them might with propriety be removed—notably the medicines and vessels. Outside the cottage all looks calm and beautiful.

The Learned and Eminent Scholar, Andrew D. White, Ex-President of Cornell University, Ithaca, N. Y., writes under date Dec. 2, 1884: "Long experience has taught my family to prize Pond's Extract very highly and to regard it as one of the absolute necessities of housekeeping." Such testimony should induce all families to at least try Pond's Extract; an invaluable remedy for all Pains and Hemorrhages.

Hay Fever.

I have been a hay fever sufferer for three years; have often heard Ely's Cream Balm spoken of in the highest terms; did not take much stock in it because of the many quack medicines. A friend persuaded me to try the Balm, and I did so with wonderful success—T. S. Greer, Syracuse, N. Y.

I can recommend Ely's Cream Balm to all hay fever sufferers, it is, in my opinion, a sure cure. I was afflicted for 25 years, and never before found permanent relief.—W. H. Huskins, Marshfield, Vt.

AN incident in the under stratum of social life was brought to official notice, in Chicago, in a way to suggest a new phase of industry, if properly developed. A man over whom the effects of numerous potations were gradually creeping, but who still retained sufficient mental acuteness to realize the need of a protector, hired a small boy, at the reasonable compensation of a nickel, to guard him while he slept off "the influence" in a box-car. The urchin had no sooner begun his vigil than he was approached by two speculative men, who hired him for a dime to go and see what time it was. Little Gavroche pretended to accept the offer, but secreted himself near by and watched the fellows rob his unconscious patron. Then he had them arrested. A system of watch-boys would be a profitable business enterprise, if such shrewd chaps as this one could be secured, for the benefit of men who desire to see life and are not able to resist the effects of the adventure.

THE Baldwin Locomotive Works, Philadelphia, have just completed and shipped engine numbered 8,000. The first locomotive built by these works was turned out in December, 1832, and it took twenty years, until November, 1852, to build 500 engines. The second 500 engines was built in eight years, number 1,000 being finished February, 1860. The next six years saw the third 500 built, number 1,500 leaving the shop July, 1866. The fourth 500 were built in three years, by Oct. 30, 1869; the fifth 500 in two years, and the sixth and seventh 500 each in one year, engine 3,500 leaving Nov. 20, 1873. Business then slackened, three years being required to build the next 500, and two years the following 500, engine number 4,500 leaving Dec. 17, 1878. Then trade improved, 500 engines being built in fifteen months, and 1,000 more engines in twenty-two months, while 500 more engines were finished in ten months, number 6,500 leaving Dec. 6, 1882, and marking a half century for the works. The next eight months saw 500 more built, and before the close of 1881 number 7,500 was turned out. Work has again slackened, and nineteen months were required for the final 500 locomotives, number 8,000 having just left the establishment.

TUESDAY, AUG. 24, 1886.

REGARDING M. Pasteur's treatment for hydrophobia Dr. Charles R. Drysdale, senior physician to the London Metropolitan Free Hospital, writes as follows to the London *Times* from Paris:

Having felt some uncertainty as to the efficacy of M. Pasteur's process for combating that fatal disease hydrophobia, I came here some days ago to study the question and the evidence on the spot. I hasten to say that all my doubts as to the validity of this greatest of modern discoveries have been dispelled, and for the following reasons: M. Grancher, who has made a careful analysis of the cases treated up to the 10th of June at the Rue Vaugelin, informed me that of ninety-six patients bitten by dogs (the disease of which was certified either by the inoculation of other animals after their death with the brain or spinal cord proving fatal, or by the fact that some animal bitten by the dog had succumbed to hydrophobia), of these ninety-six cases only one died subsequently to the curative inoculations. This gives a death rate of only 1.04 per cent. Again, 644 patients had been bitten by dogs, the madness of which was certified to by the veterinary practitioner of the commune, and out of these there were three deaths, which gives a death-rate of 0.46 per cent. Taking these two categories together, the death-rate was only 0.75 per cent., whereas from a very accurate series of statistics collected by M. Leblanc, veterinary practitioner of the city of Paris, it results that, as a rule, 16 per cent of such cases may be expected to succumb to hydrophobia. The value, then, as M. Grancher says, of the curative process of M. Pasteur may be represented as twenty-three times as great as that of all other treatments. I may add that, with the exception of the prick with the fine-pointed injection syringe, patients have no other annoyance to complain of, as there are absolutely no symptoms, and ten punctures on ten successive days are sufficient. To me the question is, therefore, judged, and all who are in danger should submit to this little operation.

MISS DOLORES LEEONARTY CASSANOVAS has just received the degree of M. D., at Barcelona. She began, says the *Pall Mall Gazette*, her university studies at the age of 8, when at 13 she became a B. A., and now, at the ripe age 19, after coming out first in all her examinations, and taking numerous prizes, she is a fully qualified physician and surgeon. Fancy a female B. A. of 13 discoursing on hideous diseases with six-syllabled names, and correctly diagnosing and prescribing for her brothers and sisters! But it is what we have got to expect, and the fair Spaniard is to be congratulated on being the first of her sex to show what can be done in the way of rapid development. Miss Dolores, etc., may be fairly addressed, like her namesake sung of by Swinburne, as 'wise among women and wisest, our Lady of Pain.'

LAW CLERK AUSTETT, of the Supervising Architect's Office of the Treasury Department at Washington, is authority for the following story: Gov. Thompson, the new Assistant Secretary, who succeeded the Hon. William E. Smith in that position, has been tormented by a large number of office-seekers since he assumed charge of the appointing power. He has already learned how to distinguish the professional place-hunter. A great proportion of those who come to him are, of course, those who have applied to his predecessor and are still waiting. Their unquenchable desire to serve their country and themselves in the Treasury Department leads them to attempt a little imposition upon Gov. Thompson. Every day some one of them prefaces his or her application with the statement: "Your predecessor, Mr. Smith, promised that I should have a position on such and such a day," naming almost the hour when they were to receive their appointment. This little trick of theirs was related to Mr. Smith when he visited the Department last week; and calling upon Gov. Thompson a few minutes later he remarked good-naturedly: "If you believe all the stories office-seekers tell you about me you must believe me to be the greatest economizer of truth on earth," "Oh, no," replied the Governor quickly, "I don't believe that, but I am beginning to think you the most promising man in America."

"THE Emperor of Russia," according to the London *Truth*, "is desirous of forming a new sort of Holy Alliance for the purpose of 'boycotting' France, as a punishment for the expulsion of the Orleans Princes. It is proposed that the members of this solemn league and covenant shall bind themselves not to visit Paris, Cannes, Nice, or any place in France, and the *mot d'ordre* is to be sent about that courtiers and others who disport themselves in that country will get into disgrace. The abrupt departure from Paris last month of several members of the imperial family was caused by the Emperor's order that they should quit France. The Emperor of Austria, the King of Denmark, the King of Sweden, and the King of Italy are all more or less favorable to the Czar's proposal."

ZOLA, the famous French novelist, is now engaged upon a new novel to be called "La Terre," which will be devoted to the examination of the life of the peasantry, with special reference to their earth-hunger. He hopes to have it ready by the beginning of next year. Afterward, it is said, he will take up railways, the army, and journalism as the subjects of three more novels.

THE CITY.

The city council meets in regular session to-night.

Mr. Wm. Meyer, of Fitch, Meyer & Co., the hatters, went to Chicago at noon.

There was a big market this morning. This is a great feature for the thrifty housewife.

Phillip Hyman, the South Calhoun street grocer and his wife, left for Niagara Falls this morning.

Mr. Tim Hogan returned from Chicago yesterday. He had attended the meeting of the Irish Land League.

Mr. John Hoham, of Plymouth, Ind., is the guest of his son-in-law, George Locsch, the Barr street druggist.

Peter Hohnhaus, of Wall street, who fell from the roof of his new house about a week ago, is rapidly recovering.

The Huntington *Herald* "blasts" a party of Fort Wayne dudes. It is the custom of village papers to do so.

Prof. Gerberding's church-choir made an excursion to Mrs. Kern's farm last Sunday, where they spent a very pleasant day.

The Emmet Rifles paid their respects to Colonel John McCain, at the "Home" before returning to Jackson last evening.

The Women's Christian Temperance Union meets in convention at Avilla, next Friday. No Fort Wayne ladies are on the program.

The Brotherhood of Locomotive Firemen will hold its annual convention in Minneapolis, beginning on Wednesday, September 15.

Fully 3,000 people viewed the sham battle from outside the fence yesterday. The high buildings and river banks were black with people.

Mr. Wallace Wood, post commander of Emmet Post of Wabash and wife, were in the city yesterday, the guests of Mr. and Mrs. B. M. Holman.

Before Judge Hench Mary E. Asbey sued Clarence Asbey for divorce. Plaintiff was granted a divorce on charges of cruelty and failure to provide.

Don't forget the cottage meeting at the R. R. Y. M. C. A., rooms to-night at 7:30 standard time. Bring your friends, you will be made welcome.

Camp Grant is deserted and it is said the grand stand and fences will be taken down and returned to the lumber company who simply charged a rental for its use.

The railroads handled the crowds and sent the last detachment home in the small hours this morning. The Pittsburg company had to take care of 4,300 people.

Christian Kunkle died at the county asylum at 5:30 yesterday morning. Mr. Kunkle was a former tenant on Wm. Shoaff's farm in Eel River township. His age was eighty years.

Gath the well known correspondent who bitterly opposed the election of Cleveland, now says that the president is proving one of the best the country ever had, and that he will be renominated and elected. Gath's change of heart is commendable.

The Ohio Veteran association elected the following officers at their reunion: President, General W. S. Rosecrans; vice-president, J. E. Graham; adjutant, H. O. Crosby; quartermaster, Mart Swartz; Comrades H. F. Underwood, Peru; Captain Gablin, Jackson, Michigan, and Commander Centerville, Post Ohio, executive committee.

Already the society people, who are fond of amusements, are beginning to inquire, "What will take the place of the roller skating rink this winter?" Progressive euchre appears to have had its run, while checkers and chess are decidedly old fashioned. The use of quilts, which formerly necessitated "quilting bees," has been done away with by the new and cheap spreads, so that it now looks as though people would settle down to the original game of whist.

Master Benoit Ellert is confined to his bed with typhoid fever.

The construction train took a load of steel rails to the starting point of the M., G. R. and I., yesterday, and the work of laying the iron will begin immediately. The track laying machine, which is to be used in the work, has not yet arrived, but is expected in a week or ten days. With this machine and a gang of forty or forty-five men the iron can be laid at the rate of a mile and a quarter a day and it is possible to lay one mile and a half in a day. This is a great time-saving machine, as by the ordinary way of laying iron a half mile is a large day's work.

GAS AND OIL.

The Chances of Finding Them in Fort Wayne.

The preparations to sink a well for oil or gas in this city is exciting a good deal of mental speculation and the contractor will sink a shaft next week. Professor John Collett, who has been inspecting the gas and oil regions in Ohio says that the northern part of Indiana, particularly north of the Wabash and Iroquois rivers, presents the same geological features that are presented in the gas and oil regions of Ohio, and there is, consequently, a possibility of finding gas and oil, but no great probability, and he thinks that the prospects are not sufficient to justify an individual in putting down a well. His idea is that each county in the extreme northern portion of the state should vote a sufficient appropriation to put down three wells, one in the center, one in the northwestern and one in the southwestern portion, and that the cost of this would be about fifty cents a foot for the first 500 feet, eighty cents a foot for the next 500 and $1 a foot for the next 500 feet. The contract should be made at such a scale of prices for a six inch well, with the privilege of stopping where gas or oil was met; but, if necessary, eventually going to the depth of 2,000 feet.

EX-TREASURER SPINNER writes a letter to a Washington paper, in which he tells how the first employment of female clerks in the Government service came about. General Spinner himself was the first to suggest the innovation, and urged upon the Secretary of the Treasury and other officials that young women could not only do much of the clerical work better and faster than men, but that they could be secured for half the wages. Mr. Spinner dwells particularly upon this point in his letter, and seems to plume himself quite as much upon his economical notions as upon his part in opening the departments to women. The ex-Treasurer is entitled to limited thanks from the women employes of the Government. Had he omitted to discriminate against them in the matter of wages, they would rise up and call him blessed.

An Old Stand, But a New Firm.

They invite all to pay them a visit, knowing they can please and furnish first-class meats of all kinds.

We understand that Messrs. Dawson & Karn, the music dealers, leave this evening for New York City. He Appreciates a Mother-in-Law

A Dakota editor made the following statement in his paper a few weeks since:

"Times being rather hard, we are going to take our wife to the home of her mother-in-law next week for a short visit and we will give our readers a short vacation by not issuing any paper. They won't lose much, for there is little news going just now, and we print this week an editorial on the tariff which would have appeared next week. The only thing that we had to leave out on this account is Bill Jones' ad. about a farm for sale, but that will be of no consequence as he hasn't paid us anything for it yet. Brethren, white paper is too blamed dear to fool it away when our mother-in-law will keep us a week for nothing.

"What we learn with pleasure we never forget,"—Alfred Mercier. The following is a case in point. "I paid out hundreds of dollars without receiving any benefit," says Mrs. Emily Rhonds, of McBrides, Mich. "I had female complaints, especially 'dragging-down,' for over six years. Dr. R. V. Pierce's 'Favorite Prescription' did me more good than any medicine I ever took. I advise every sick lady to take it." And so do we. It never disappoints its patrons. Drug gists sell it.

Its range is so wide, and its good effects so sure, that nothing else, except good nursing, are needed in a great majority of cases. Buy it, try it, and afterwards it will not require any praise from us.

ON THE INCREASE.

The Havoc of Bright's Disease

(From the Louisville (Ky.) Courier-Journal.)

The greed of distillers has urged them to push their distillations so as to get as much whiskey from the grain as possible. From the old-time standard of one gallon and a half they have increased the product to three, then to four, and some distillers boast of getting even five gallons of whiskey from a bushel of grain. This increased product is obtained by raising the temperature until both the volatile and the essential oils from destructive distillation are thrown off, and consequently an increased percentage of fusel oils (deadly poison) is found mixed with the whiskey and cannot easily be gotten rid of. This fusel oil will seriously damage the stomach of those who drink it; or if the stomach escape, this poison affects the kidneys, producing glandular degeneration, a form of Bright's disease, which is to-day alarmingly prevalent and on the increase. Fusel oil is closely allied to creosote in its characteristics and its effects on the human system. It is a corrosive poison, that, in its concentrated form, will immediately kill if swallowed, or if allowed to linger in the tissues does destructive work upon the delicate vital organs." The discoverers and only manufacturers in the world of an absolutely pure whiskey, entirely free from fusel oil, pledge their article to be not only a distillation from malt—the malt supplying the food quality—but by a costly process of redistillation it is rendered so entirely devoid of any poisonous principle, that the most distinguished chemists certify "that no trace of fusel oil is to be found in it." By this process the fire that crazes the brain and vitiates the blood is also eliminated, but at the same time none of its delicate aroma is lost—none of its valerianates are destroyed—and its strength remains the same with its full flavor. It is not to be considered even a mild stimulant, as it remains a strong intoxicant. It is not a medicated whisky, but a pure whiskey for medicinal use, demanded by the medical profession: hence the Duffy's pure malt whisky is not only a standard of the pharmacopœia, but, as a beverage, it is the preferred and most popular among the best and oldest whiskies in the market.

Almost every family had a visitor during the encampment.
